Tsuruoka Daiyon Junior High Students Visit Yorozu Corporation

As with last year, six students from Tsuruoka Daiyon Junior High School visited Yokohama head office on May 21 as part of their school excursion.

During their visit, we held a mock web conference with YYMC (Yamagata), YTC (Thailand), and W-YBM (China) to give the students a sense of what it's like to work in a global company.

Their young eyes shining with hope were impressive and left us wishing to create an opportunity to meet the students again next year.

At Yokohama HQ
with Vice Chairman Shido

We received letters from students expressing their gratitude.

Thank you letter 1

Thank you for taking the time to let us visit your company during our school trip for a valuable experience. Your workplace was filled with a positive atmosphere as we watched everyone work. Through this experience, there were many things that I learned: countless discussions are held before a part is finally completed; products are a result of intensive collaboration with overseas Yorozu affiliates; and many different business partners are also involved in the production. I was reminded of the importance and meaning of work and intend to make the most of what I gained from this visit when planning my future career.

Last of all, I wish for your company's continuous growth and success.

Thank you letter 2

Thank you very much for giving us such a valuable opportunity to visit your company during our school trip. Through this experience, we learned that Yorozu handles the entire process from development to manufacturing. During the global meeting we attended, the details were explained clearly, which helped us understand that overseas sites work differently from the sites in Japan. By asking questions and receiving honest answers, we were able to learn more about Yorozu. It was interesting to learn that each part and component helps vehicles and machines function and plays an important role in the world.

I was also impressed by the fabrication of bear cage traps and donation to Yamagata Pref., where damage from bears has been increasing recently. I hope the number of bears will decrease as much as possible.

I learned many things through this visit and came to understand the importance and meaning of work. I will use this experience in my life from now on.

Last but not least, I hope that Yorozu will continue to prosper and develop for many years to come.
